## Dedication

MR. EDMUND C. PUDDICOMBE
During the day you ean see him lecturing physiology classes in Room 291; after school you might find him sponsoring an SMS meeting or working on the illustrations for his loose-leaf notebook that his students use; or on a free day you might find him taking SMS members on a field trip to some research center or hospital.

This is Mr. Edmund C. Puddicombe. For years he has readily given his services and time to the junior college, especially to the Students of Medical Science, one of the most active clubs of the school. Words cannot measure these services, cannot give even a slight hint of the time spent.

This year we dedicate The Shicld to Mr. Puddicombe to show that his efforts and help are appreciated.

## Yearbook Staff

RON KNAKMUHS
Assistant Editor, Faculty and Administration.

Some members of the yearbook staff discussing deadlines that have to be met are Ron Knakmuhs, Gerri McKanna, Bill Schroeder, Les Nelson, Edelgärd, Eichholz, and Andy Klavins.

## A Message From The Dan and The Assistant Dean

Every commencement many graduates say how much they have enjoyed junior college and how fast the time has flown. Thus it will be with most of the rest of your lives. Time rests easy on the shoulders of those who have learned many of the basic lessons junior college teaches.

You have learned that life has success as well as defeat, that today lived well makes yesterday and tomorrow better, that every now and then you get slapped when you thought you would get praised, or vice versa, and that friends are more precious than gold You have learned that life can be beautiful as well as sad, and that you can cope with the problems it brings.

You are to be complimented, for you have achieved something of which you can well be proud.

ELMER W. ROWLEY, Dean

SUSAN H. WOOD, Assistant Dean
B.S., M.A., University of Illinois

Assistant Director, Adult Education

Greetings to the 1958 graduates of the Joliet Junior College. During the two years you have been with us, the launching of satellites, the plans for a trip to the moon in the not too distant future, and the promise of even speedier jet planes by the close of the year make this a most exciting world. To live in such times, uncertain and even perilous though they may be, education plays an important role. Hundreds of years ago Socrates described the educated man as one who could control circumstances and not be mastered by them. To live in such a rapidly changing world, seek every opportunity to learn more about it and the people who live within it.
